Khushnuma Baluchi

Full Stack Developer | React.js | Angular | Node.js | NestJS | JavaScript | TypeScript

Surat, India | khushnuma22.work@gmail.com | +91 7572965547 | LinkedIn

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building and maintaining scalable web and SaaS applications with React.js, Angular, Node.js, Express.js, NestJS, JavaScript, TypeScript, and MongoDB, including MERN and MEAN stack projects. Experienced in designing RESTful APIs, authentication and role-based access control, Stripe and Plaid payment integrations, real-time features with Socket.IO, and cloud deployments on GCP using Docker, Terraform, and GitHub Actions CI/CD.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Angular, Redux Toolkit, RTK Query, Material UI, Bootstrap, EJS

Backend: Node.js, Express.js, NestJS, RESTful APIs, Swagger, Socket.IO, Passport.js, JWT, OAuth (Google/Facebook), RBAC

Mobile: NativeScript (Android/iOS), Firebase Cloud Messaging

Databases: MongoDB, Firebase Firestore

APIs & Integrations: Stripe (Subscriptions, Webhooks, Terminal), Plaid, SendGrid, Dropbox Sign, Ecwid, Railz, ShipTime, Duda, Google Maps API

Architecture: MERN, MEAN, Multi-Tenant SaaS, REST API Design, Real-Time Applications, Third-Party API Integration

Cloud & DevOps: GCP (Cloud Run, Cloud Run Jobs, Cloud Scheduler, Cloud Storage, Secret Manager), Docker, Terraform, GitHub Actions, CI/CD, PM2, Hetzner, DigitalOcean

Tools: Git, GitHub, Assembla, Asana, MongoDB Compass, NoSQLBooster

PROFESSIONAL EXPERIENCE

Full-Stack Developer, WebOsmotic Pvt Ltd **2023 – Present**

Surat, India

- Build and maintain full-stack web and SaaS applications for client projects using React.js, Angular, Node.js, Express.js, NestJS, and TypeScript, with MongoDB and Firebase Firestore as data stores.
- Design and document REST APIs covering authentication, billing, subscriptions, and third-party integrations.
- Integrate Stripe and Plaid payments, OAuth and JWT authentication, and Socket.IO real-time features.
- Manage cloud deployments and CI/CD on GCP, Hetzner, and DigitalOcean using Docker, Terraform, and GitHub Actions.
- Communicate directly with clients through chat to understand requirements, provide technical guidance, and ensure successful delivery.

PAID | *Multi-Service SaaS Platform for payments, subscriptions, online checkout, shipping, and team management*
Technologies: Node.js, Express.js, TypeScript, MongoDB, Socket.IO, Stripe, Swagger, Docker, GCP, GitHub Actions

- Built REST APIs for accounts, billing, subscriptions, teams, and administration.
- Implemented Stripe payments, subscriptions, refunds, Terminal transactions, and webhooks; secured access with JWT, Google/Facebook OAuth, and role-based access control (RBAC).
- Integrated Ecwid, Railz, ShipTime, Duda, and SendGrid; developed Socket.IO real-time events and scheduled workflows with Cloud Run Jobs and Cloud Scheduler.
- Automated Docker deployments to GCP Cloud Run with GitHub Actions and managed secrets with GCP Secret Manager.

WAREHOWZ | *On-Demand Warehousing Marketplace for storage, quotes, listings, contracts, inventory, invoicing, and payments*
Technologies: Node.js, Express.js, MongoDB, EJS, Passport.js, Socket.IO, Stripe, Plaid, SendGrid, Docker, Terraform, GCP, GitHub Actions

- Developed buyer, provider, and manager workflows for projects, quotes, listings, inventory, and invoicing.
- Integrated Stripe, Plaid, Dropbox Sign, and SendGrid; implemented Passport.js local authentication and Google/Facebook OAuth.
- Built Socket.IO chat and support features, plus Cloud Run Jobs and Cloud Scheduler workflows for payments, expirations, and renewals.
- Managed GCP infrastructure with Terraform and automated Docker deployments with GitHub Actions.

MCSPIRIT | *Community Platform for posts, courses, events, memberships, notifications, and subscriptions*
Technologies: NestJS, Node.js, TypeScript, MongoDB, React.js, Redux Toolkit, Material UI, Socket.IO, Stripe, EJS

- Contributed to NestJS backend and React.js frontend development, maintenance, bug fixing, and API integration.
- Implemented scheduled summary and digest emails using NestJS Schedule and cron jobs.

- Improved responsive React.js and Material UI screens and managed state with Redux Toolkit.
- Contributed to Socket.IO real-time functionality and maintained Stripe subscription features.

FRIENDLYFORCE | *Disaster & Incident Communication Platform connecting vulnerable people and pets with nearby support*
Technologies: NativeScript, Angular, Firebase Firestore, Firebase Authentication, Firebase Cloud Messaging, Google Maps API

- Developed Android and iOS features using NativeScript and Angular.
- Implemented real-time incident synchronization, user authentication, and emergency push notifications with Firebase.
- Integrated Google Maps API for location-based incident reporting and visualization.

EDUCATION

Master of Computer Applications (MCA), Veer Narmad South Gujarat University
Bachelor of Computer Applications (BCA), UCCC & SPBCBA & SDHG College of BCA & IT
